If you try launching from your browser on Windows and you see a message from Microsoft Defender SmartScreen when running the setup.exe you'll have to follow these steps:

1. Click "More Info"

2 Click "Run Anyway":

Windows protected your PC

Microsoft Defender SmartScreen prevented an unrecognized app from starting. Running this app might put your PC at risk.

App: Setup.exe
Publisher: Gaurav Walia

Signed with VALID certificate (just new)

CLICK HERE

Run anyway   Don't run

Hopefully when Microsoft sees hundreds of downloads they will build SmartScreen "reputation" faster

The file of course is clean see **VirusTotal scan results** it is just MS corporate hitting independent software vendors.

Please do this as this will help tremendously to complete the process before release of highly anticipated new Setup versions and new setup.exe versions.
